DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Piotrowski on October 13, 2004.

The application has been amended as follows:

- a) In claim 1, line 7, replace the second instance of "the" with --a--.
In line 11, between "loudspeaker" and "connected", add --directly--.
- b) In claim 2, line 1, between "wherein" and "audio", add --an--.
- c) In claim 5, line 1, between "wherein" and "connection" add --the--.
- d) In claim 6, line 2, replace "are" with --is--.

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose and would not suggest to one of ordinary skill in the art at the time of invention the inclusion of a processor that is able to receive digital audio data and deliver the audio information in the digital audio data to headphones or a loudspeaker directly connected to the footswitch that is used with a computer to form dictation machine. Specifically, the closest prior art of record discloses, in Schroder et al. (U.S. Patent 5,197,052), a footpedal that does not have the necessary processor to allow the headphones (Fig. 1, 28) to be connected directly to the footswitch (30) and to receive digital audio data from the computer (12).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Becker et al. (U.S. Patent 5,699,411) discloses an external footswitch interface where analog audio information is transmitted through a cable assembly. Sato (U.S. Patent 4,426,738) discloses a remote footswitch for a dictation machine that is wireless. Benton, Jr. et al. (U.S. Patent 5,519,808) discloses an interface for a footswitch in which the audio data is stored at an external recorder.
